極度深潛

單靠一口氣，你可以潛得多深？自由潛水冠軍彼賓·費里拉及溫貝托·皮利茲里就可以一口氣潛下162米，相當於五十層樓高的深度。

全天域電影《極度深潛》帶領你進入這兩位自由潛水員的世界。他們以完全不同的潛水方法互相競爭。彼賓為求潛得更深，以「無限制」形式，利用下沉器協助下潛。溫貝托則以「固定重量」方式，單靠自己的體力達成目標。

透過精彩的電腦模擬，你可以進入潛水員體內，瞭解在深潛時，人體如何作出適應。歡迎與這些富有熱情、衝勁和冒險精神的潛水員，一起潛進既危險又美麗的藍色深海世界。

OceanMen: Extreme Dive

How deep can you go on just one breath of air? Champion freedivers Pipin Ferreras and Umberto Pelizzari dive to an unimaginable depth of over 162 metres on a single breath, the equivalent of a fifty-storey building.

The Omnimax film "OceanMen" takes you into the world of these two awe-inspiring freedivers as they compete against each other, using completely different diving philosophies. Pipin is a *No Limit* man who uses a weighted sled to plunge himself deeper into the ocean, whereas Umberto relies only on his strength as a swimmer to reach his goal with *Constant Weight*.

Marvelous computer graphics escorts you on a journey through the divers' bodies to visualize how the human body transforms as the divers descend to record-breaking depths. Hold your breath to accompany the divers as they dive into the deep blue world of danger and stunning beauty with passion, drive and adventure.
