

香港是一個生物多樣性非常豐富的城市，除了園區的動物，香港動植物公園也是其他本地動物的家。跟著地圖，找出繪畫在園內的16種香港野生動物吧！

Hong Kong has rich biodiversity, apart from the animal residents, Hong Kong Zoological and Botanical Gardens is home to other native wildlife as well! Follow the map below to search for 16 animals painted in the park!

當你找到這些野生動物時，請在牠們的英文名稱中找出各自的密碼字母，並按牠們的編號填上，便能破解密碼，找出幫助牠們的方法！

Once you found the animals, write down their highlighted letters according to their numbers, and find out the method to help them!

2	10	12	14	3	16	8
4	9	11				
7	13	6	1	5	15	

日間我躲在用蒲葵葉築的巢裡，到晚上才出來覓食。
I rest in the nest built with Chinese fan-palm's leaves during the day, and only forage at night.

1 短吻果蝠
SHORT-NOSED FRUIT BAT
Cynopterus sphinx

別看我身形圓胖，我擅長挖土，亦能攀樹！
I am fat and round, but I am good at digging and climbing trees!

2 花狹口蛙
ASIATIC PAINTED FROG
Kaloula pulchra

我的警戒心很強，會驅趕接近我鳥巢的可疑物！
I am very defensive and will chase away all suspicious creatures!

3 紅嘴藍鵲
RED-BILLED BLUE MAGPIE
Urocissa erythrorhyncha

4 褐斑異痣蟴
COMMON BLUETAILED
Ischnura senegalensis

我是少數能忍受微鹹水生境的豆娘！
I am one of the very few damselflies that can tolerate fairly brackish water!

我們有細長而且彎曲的嘴，方便伸進花朵蜜囊吸取花蜜。
We have decurved bills that allow us to feed on nectar.

5 叉尾太陽鳥
FORK-TAILED SUNBIRD
Aethopyga christinae

若成功找出方法，並希望成為保護牠們的一份子，記得到教育及展覽中心蓋上完成印章！
If you are willing to help the animals with this method, you can go to the Education and Exhibition Centre to get the completion stamp!

6 斑腿泛樹蛙
BROWN TREE FROG

Polypedates megacephalus

求偶時我會發出像狗吠的鳴叫聲。
My mating calls sound like dog's barking.

我非常擅長爬樹，亦愛擺甫士，但受驚時或會嚇到失禁。
I am a great tree climber and love posing for pictures, but I might pee on myself when frightened.

我有毒性，會用鮮艷的顏色來警戒捕食者。
My bright colours are used to warn predators that I am poisonous.

8 虎斑蝶
COMMON TIGER
Danaus genutia

9 紫嘯鶇
BLUE WHISTLING-THRUSH
Myophonus caeruleus

我會用蜘蛛絲或植物纖維把葉子縫在一起築巢！
I use spider silk or plant fiber to stitch leaves together for nesting!

我常在地上走來走去，尋找可以食用的昆蟲及種子。
I often walk on ground to search for insects and seeds to eat.

11 黑領棕鳥
BLACK-COLLARED STARLING
Gracupica nigricollis

10 長尾縫葉鶇
COMMON TAILORBIRD
Orthotomus sutorius

雖然我飛行速度較緩慢，但我的警覺性極高！
I fly very slowly, but I am very alert and sensitive!

12 寬邊黃粉蝶
COMMON GRASS YELLOW
Eurema hecabe

我會把吃不完的果實收藏起來等之後再吃，但不久我會忘記收藏的位置。
I will hide extra fruits for storage, but sometimes I may forget where I hide them.

14 赤腹松鼠
RED-BELLIED TREE SQUIRREL
Callosciurus erythraeus

我的祖先原本是寵物，於1941年在香港被野放後，繁衍至今成為全球最大的野化種群。
My ancestors were pets; they were released in 1941 in Hong Kong, and became the largest exotic population.

若外殼下的翅膀濕透了，我便無法飛行。
I cannot fly if the wings under my outer shell are wet.

13 十眼裸瓢蟲
TEN-SPOTTED LADY BEETLE
Bothrocalvia pupillata

我主要捕食小型哺乳類及鳥類。
I mainly prey on small mammals and birds.

15 鳳頭鷹
CRESTED GOSHAWK
Accipiter trivirgatus

16 小葵花鳳頭鸚鵡
YELLOW-CRESTED COCKATOO
Cacatua sulphurea
