Landscape Area : Almost 40% Green Landscape coverage

St Andrews Place is a quality residential development, set on exclusive land at Sheung Shui with total 26 individual houses and deluxe club house where offers all the comfort of modern and idleness living to the residents.

The development integrates a delightful natural garden with the beauty of the esteemed neighbourhood. A rich palette, in addition to the preserved trees and variety of plant types, sizes and colours add visual highlights and foci along the passageways and re-introduce habitats for birds and butterflies into the site.

Regular landscape maintenance programmes carried out at St Andrews Place include pruning and trimming of shrubs and trees, edging and weeding, fertilizing and applying appropriate and adequate pesticides to maintain healthy growth and shape of trees, shrubs and plants. These programmes can also avoid overcrowding and blocking sight of houses and enhance ventilation in the estate.

Overhanging canopy trees along the road provide a green shelter along the main spine of the development. Colourful and flowering shrubs, shade-tolerant plants and rustic boulders have been arranged in such a way that a delightful contrast of texture, colour and form is created along the streetscape.
